Ease of Use

CourseMill enables instructors, students, and administrators to easily and effectively administer, manage, track, and take online courses and curriculum. CourseMill provides student self-enrollment, single click course upload, shopping cart support, wait list functionality, and more.

Affordability

CourseMill delivers an affordable elearning management solution for under \$15K! CourseMill is the best value-priced LMS on the market today because it couples robust features with a low cost. Other LMSs with comparable features are often double or triple the cost.

Company Networking

CourseMill makes interaction between users fun and simple. With beneficial features that you can control such as real time chat, internal and external email, instant messaging, mass emailing, and document sharing, communicating with one another is easier than ever before!

Robust Reporting

Makes the tracking and reporting of online courses simple and hassle-free by enabling users to easily create an unlimited number of reports. You control who has access to data so others can track the status of students.

Flexibility

With CourseMill you can create your own custom look and feel and choose what features are right for your organization. CourseMill provides MySQL database support, 3rd party content support, AICC and SCORM compliance, classroom based training support for blended learning, and much more to provide you with the flexibility for a range of uses.

Features Guide

Feature	Description
Beneficial Features for Learners/Students	
Customizable Interface	Creating a customized CourseMill user interface to match your company brand or blending the look and feel of existing courses helps learners associate content with your organization and feel connected.
Automatic Student Registration	Ability for students to quickly register for courses as well as view course names, descriptions, and notes in one centralized location. They can automatically enroll for courses, chat, and email groups.
Advanced Quick Search*	Easily search and sort through courses, curriculum, and user lists by course ID, name, description, or email saving time and effort.
Updated Interface*	Enhanced user-friendly interface enables users to navigate through CourseMill efficiently.
Convenient Internal and External Email Capabilities	Conveniently choose to directly send and receive email through CourseMill without ever having to use an external email program or use your own personal email address to communicate.
Blended Learning Support	Instructor-led training can be scheduled directly into CourseMill which automatically places the registered course names and dates in each learner's course calendar.
Automatic Calendar Updates	CourseMill provides easy organization and reminders with a course calendar that automatically updates course information for instructor-led sessions for online courses and lists dates of mandatory classes that have not yet been taken.
Report Cards*	Students can conveniently track their course history and grades by viewing their own report cards.
Interactive Course Discussion Board	Learners can post their comments and questions to share with colleagues and instructors. They can also quickly search through forums with the simple click of a button to find the course topic of their choice.
Real Time Chat	Live, real-time discussion forums with colleagues and instructors promote idea sharing, social networking, and user interaction among learners.
Instant Messaging	With a built-in instant messaging feature, learners can engage in a one-on-one dialogue with instructors and colleagues.
Simple Document Posting & Sharing	Ability to access and share course-related materials for both online and instructor-led courses makes file sharing quick and easy.
Automatic Course Bookmarking	Multiple learners can conveniently login from any computer and return to the same place in their registered course where they left off prior to logging out of the system.
Wait List Functionality	Learners are added to a course wait list when a class is full and upon availability are automatically notified that they have been moved to enrollment status, making course registration and scheduling hassle-free.
Completion Certificates	Automatically receive a completion certificate via email upon the completion of a course, providing learners with immediate verification toward passing a course.
Online Help*	Find the answers to your CourseMill questions with the simple click of a button to access the new online help tool.

* New Features in CourseMill 5.0

Features Guide

Feature	Description
Beneficial Features for Instructors	
Customizable Learning Management System	Unlike most LMSs, CourseMill is completely customizable, providing you with the ability to make CourseMill your very own LMS. Easily customize CourseMill's look and feel with your organization's logo and graphics. CourseMill easily integrates and supports the most commonly used SQL database servers.
Easy Student Registration/ Bulk Enrollment	Instantly upload thousands of learners' names and data at one time. Enable learners to automatically enroll in courses or provide them with a course password for added security.
Curriculum*	Easily create curriculum by bundling courses together to create learning tracks with multiple courses.
Status Reports	Easily complete compliance reporting by instantly running reports on the completion status of courses. See the status for specific names and view access dates. Easily filter out all information by your desired subject and export the reports directly into an Excel spreadsheet.
Interactions Reports	View detailed information on certain questions and have the ability to view the specific learner's answers to desired questions. This enables you to see how easy or hard specific questions are for students.
Scores Reports	Quickly view each student's individual scores on specific courses.
GradeBook Reports	Stay organized and provide students with an easy-to-read scoring system by utilizing a traditional gradebook style of reporting to display instructor-led training test scores and status.
Custom Reports	Create and run your own custom reports in CourseMill and export to Microsoft Excel, saving ample time and effort.
Transaction Reports*	Track which students purchased particular courses, how much they spent, and more.
Transcript Reports*	View the history of all students to see what courses were taken, what scores they received, how long it took them to complete each course, and more.
Automatic Reporting*	Automatically run, archive, or email status reports at select intervals.
Easy Tracking of Instructor-Led Training	The integration of classroom and online training is now quick and easy with CourseMill, saving instructors and administrators time and effort. Quickly search for instructor-led training completion status and scores.
Multiple Instructors per Course	Any number of instructors can now teach a course which provides more convenient course management and added flexibility.
Printable Class Roster	Instructors have the ability to print a hard copy of the class sign-up sheet in order to quickly and easily view the names of the learners that attended each class.
Time Saving Email Capabilities	Easily send bulk emails and bulk reports to any or all individuals directly in CourseMill or through an external email program such as Microsoft Outlook.
Convenient Email Templates	Save the body of an email as a template, enabling you to save time and effort by utilizing the same format and text for additional emails.
Course and Curriculum Percentage Status*	View the percentage of completion for each student to easily see how far a student is through a specified course or curriculum.
Expanded Registration*	Automatically collect personal contact information about students during registration if needed.

* New Features in CourseMill 5.0

Features Guide

Feature	Description
Beneficial Features for Instructors	
External Document Linking*	Conveniently access external documents for grading or review by creating a link to documents within courses and curricula, thus eliminating the need to import documents into a course.
Enhanced Email Security	Securely set email restrictions on courses. If instructors choose, they can block email between students by only allowing instructors to receive emails.
Maximum Enrollment Settings	Eliminate overfilled classes with the ability to set a maximum number of students allowed per course.
Interactive Course Bulletin Board	Stay connected with your learners by conveniently creating and posting your very own course bulletin boards. Easily receive feedback and questions on courses and post your replies.
Simple Document Posting & Sharing	Save time and effort by posting and sharing any course-related document with learners.
Real Time Chat	Engage in live, real-time discussion forums with your learners to promote idea sharing, social networking, and user interaction.
Instant Messaging	Easily engage in a one-on-one dialogue with learners via the built-in instant messaging feature.
Advanced Quick Search*	Quickly search for learners within courses, curricula, and user lists by course ID, name, descriptions or email. Makes organization, management, and administration fast and easy.
Customizable Learner Data	Conveniently customize learner data in any category that you choose, providing greater organization and ease of use. You can then view, sort, and track data based on any or all categories.
Transcript Reports*	View the history of all students to see what courses were taken, what scores they received, how long it took them to complete each course, and more.
Extensive Database Compliance	CourseMill provides added convenience and flexibility by supporting a wide range of databases and learning management standards, such as SCORM, AICC, Disconnected SCORM, non-SCORM courses, and database integration.
Easy Course Disable	Disable courses without having to remove it from CourseMill by easily adding course start and end dates.
No Plug-in Required	CourseMill is completely free of the requirement for client-side Java, which eliminates the need for students to have Java installed on their computers.
Student/Instructor Toggle Modes	Instructors can toggle to student views enabling them to see courses and course organization from the learner's perspective.
Recurring Sessions	Save time by scheduling recurring course sessions.
Online Help*	Find the answers to your CourseMill questions with the simple click of a button to access the new online help tool.
Beneficial Features for Reporters	
Supervisor/Manager Reporting*	Define a Reporter to a curriculum or course to enable supervisors and managers to view and create reports in order to track the status and success of their employees.
Automatic Status Reports*	Automatically generate status reports and have them emailed on selected days.
Transcript Reports*	View the history of all students to see what courses were taken, what scores they received, how long it took them to complete each course, and more.

Feature	Description
Beneficial Features for Administrators	
One Day Installation	CourseMill installation and implementation only takes one day or less, thus making CourseMill the perfect solution for those who want to get their LMS up and running immediately.
Data Organization and Categorizing	Organize data in any format you choose, such as department or region, making running reports organized and easy.
Easily Import SCORM and AICC Compliant Content	Import SCORM, AICC, and Disconnected SCORM content directly into CourseMill with the simple click of a button, enabling you to quickly and easily post courses.
LDAP Support*	CourseMill now meets LDAP requirements by enabling you to transfer data from Enterprise Resource Systems, such as PeopleSoft, SAP, Oracle, and others. Simply export data to a web link supplied by Trivantis that communicates with CourseMill.
Shopping Cart/ eCommerce Support*	Utilize merchant processing so students can purchase courses through the CourseMill interface. This feature is optional and will support PayPal and PayFlowPro.
Course and Curriculum Duration*	Set course end dates for online purchased content to expire after a specific period of time from the date of purchase.
Internal Cost Tracking*	Conveniently assign a "cost value" for courses which enables departments and organizations to track and allocate internal training costs.
Course Discounts*	Create discount codes for courses and curricula. These codes can include either a specific dollar amount discount or a fixed percentage discount of the overall cost.
Auto-Enroll Curricula*	When using a shopping cart, save time by creating curriculums for specific groups. When not using a shopping cart, assigned curricula can be setup to auto-enroll students.
Expire Courses and Curriculum*	Set online purchased content to expire at a desired time from the date of purchase.
Dynamic Sub-Org Fields*	Sub-Organization fields are now interdependent, allowing selection of sub-org criteria to be dynamically updated based on values selected for previous fields.
Practical Administrator Course Preview	Ensure a course works correctly after import by easily previewing your course before posting.
Convenient Course Prerequisites	Administrators have the added ability to specify course prerequisites, providing greater security and standards for their organization.
Import Courses to a Remote Content Server	Course content can reside on a separate server than the CourseMill LMS Server, which increases the flexibility to house content across multiple servers.
Online Help*	Find the answers to your CourseMill questions with the simple click of a button to access the new online help tool.
Simple User Deactivation*	Easily update users by deactivating users and content for use at a later date.

Technical Specifications

Supported Server Environments

CourseMill has proven compatibility with the following web servers:

- **Apache 1.3/2.0 on Windows NT/2000/XP/Server 2003**
- **Microsoft® IIS version 4 on Windows NT**
- **Microsoft® IIS version 5 on Windows 2000**
- **Microsoft® IIS version 6 on Windows Server 2003**
- **Apache 1.3/2.0 on Mac OSX Server**

For Java Server Pages support, CourseMill operates with the following application servers:

- **Apache Tomcat 3.2/4.1/5.5**
- **JRun 3.01/4.1**
- **Websphere 6.1**
- **WebLogic 8.0/10.0**

CourseMill comes complete off the shelf with Tomcat web application server software and Apache web server software. No additional third party software required.

Minimum Installation Requirements*

Processor:	Intel Pentium II based PC or Macintosh G3
Processor Speed:	400 MHz
Operating System:	Windows® 98/ME/NT/2000/XP/Server 2003, Mac OSX, Linux or Unix.
Web Server:	Requires support for Java Server Pages (JSP 1.0 and JRE 1.4.1 or higher)
Database:	ODBC database such as MySQL, Microsoft SQL or Oracle
Disk Space:	50 MB free hard drive space for system file tracking.
Memory:	64 MB RAM plus relevant requirements of the web server and database on your platform.

Recommended Installation Requirements*

Processor:	Intel Pentium III based PC (or greater)
Processor Speed:	700 MHz (or greater)
Operating System:	Windows® NT/2000/XP/Server 2003
Web Server:	Apache Tomcat 5.5
Database:	Microsoft® SQL Server or MySQL
Disk Space:	50 MB free hard drive space for system files.
Memory:	128 MB RAM (or greater)

Ecommerce Support

CourseMill's optional ecommerce/shopping cart feature supports PayPal and PayFlowPro.

*Installation requirements are general guidelines for CourseMill installation and operation only. Requirements do not include memory and bandwidth needed for user or course capacity. The number of users which can be supported on CourseMill is completely dependent upon the memory and bandwidth capacity of the host server. CourseMill uses minimal system overhead and is scalable to meet the capacity to which the host server is configured.
