

Create Engaging eLearning with Confidence

Lectora Version 9.2

Whether you're an advanced elearning developer or just beginning in the elearning field, Lectora authoring software provides the simplicity, yet sophistication to develop professional elearning courses, presentations, assessments, and more that will engage, entertain, and educate learners.

Thousands of corporations, academic institutions, and government agencies worldwide choose Lectora for its ease of use, speed, and quality of output. To discover the power of Lectora firsthand, please visit www.trivantis.com to download a free 14-day trial.

Who Uses Lectora and Why?

eLearning Novices

- Easy to Learn
- Instant Productivity
- No Programming Skills Required
- Templates and Wizards

Occasional Developers

- Low Learning Curve
- Range of Development Options
- Flexible
- Simple Content Creation to Complex Simulations

eLearning Experts

- Media Conversion to Flash
- Interactivity
- Complex Branching
- Adaptive Learning

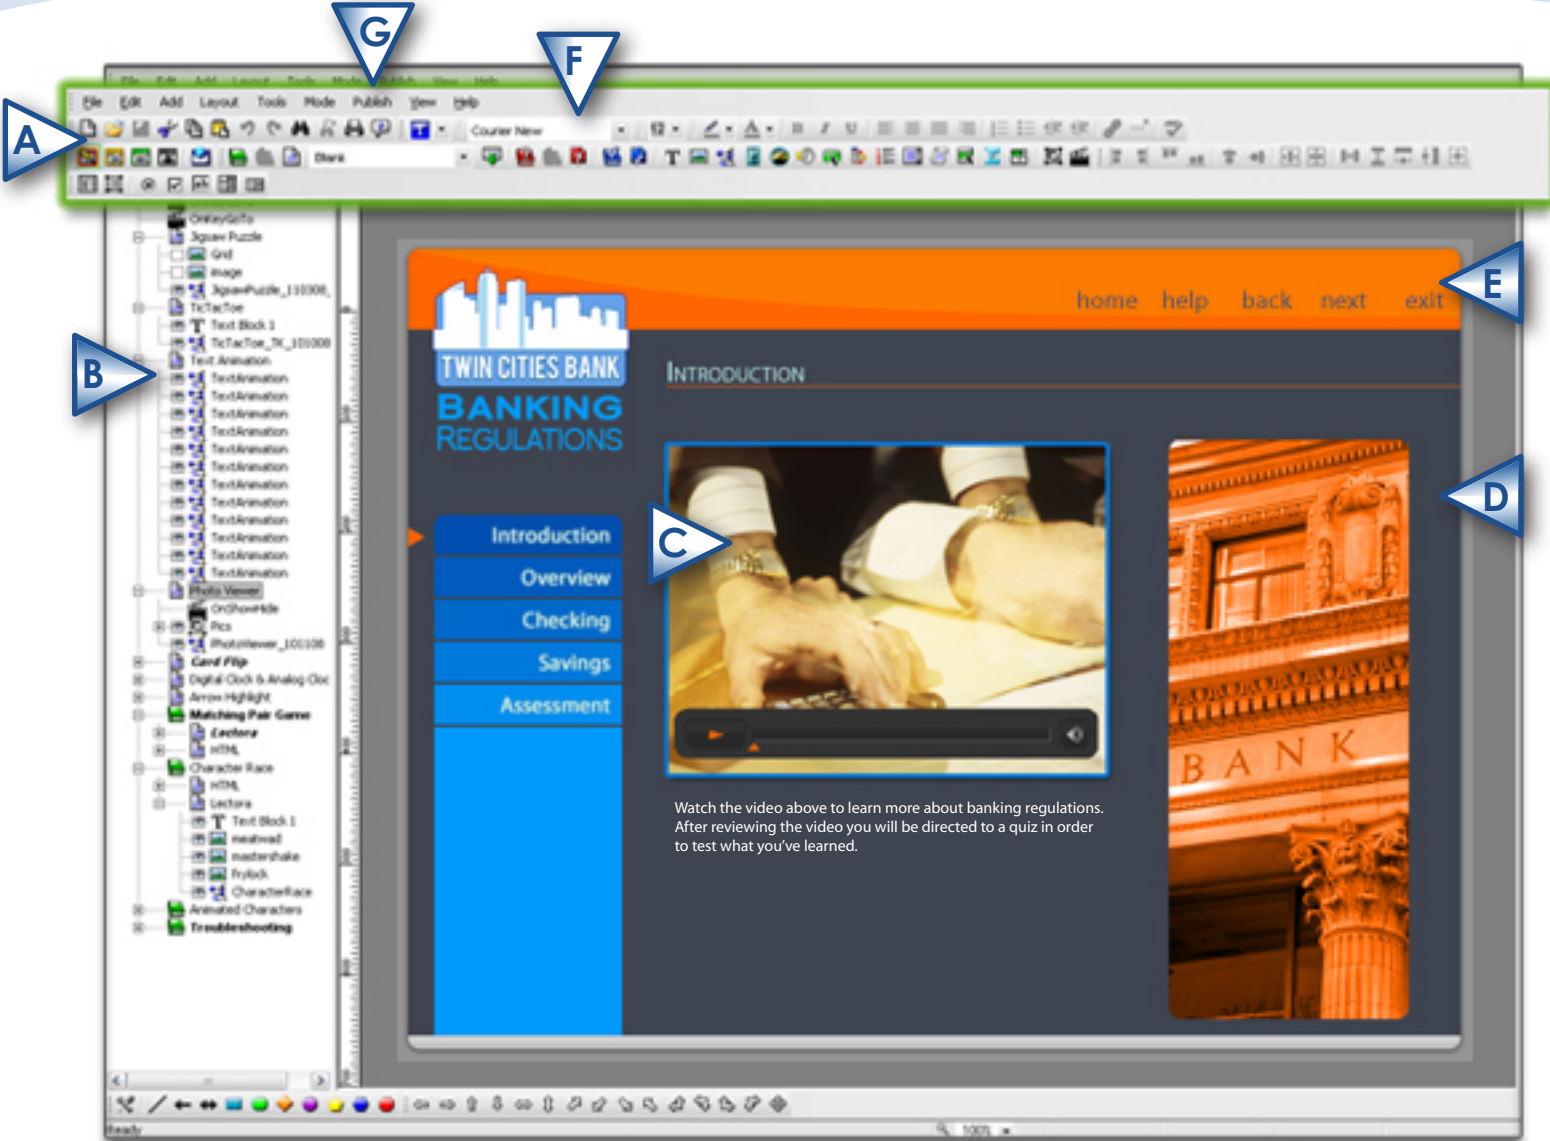

Professional Developers

- Easy Integration with Flash
- Multiple Publishing Options
- Full Creative Latitude
- LMS Compatibility

Lectora Is Used:

- By 62% of Fortune 100 Companies
- By 50% of Fortune 500 Companies
- In more than 60 countries
- By hundreds of small and medium-sized businesses
- By all five military branches

Order your copy today by calling (877) 929-0188.

A Lectora features an intuitive menu system with icon driven toolbars to quickly perform authoring functions such as importing multimedia content, designing, and building learning course interactivity.

B Lectora's left-hand pane displays the content organization in a tree view. Lectora uses a book metaphor to help you create and organize content into Chapters, Sections, and Pages. Use this pane to set up your content structure.

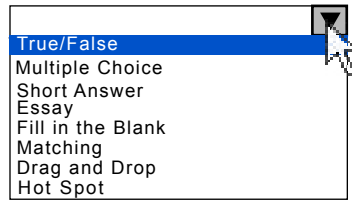

C Import a wide array of multimedia objects including audio, video, Flash animations, and more. Lectora supports all universal multimedia formats and can convert and compress audio and video to Flash format.

D Simply drag-and-drop or copy and paste text, images, animations, external documents and graphics onto the page.

E Easily build interactive navigation by using Lectora's menu builder or choose from a variety of professionally designed navigation buttons.

F Create tests, assessments, quizzes, and surveys.

G Publish your content to HTML, CD, iPhone, iPod Touch, or single file executable in just one click. Absolutely no programming experience required.

Features Guide

Feature	Description/Benefit
Standard Features	
Getting Started	
Help Agents	Quickly learn Lectora with the new interactive video help guides that provide animated tutorials on the key features in Lectora to help you begin creating content immediately with virtually no learning curve.
Title Wizards	Choose from an array of professionally created Title Wizards to quickly create the look and framework of your title, thus saving time and providing you with a starting point for content creation. Each wizard serves as a content creation guide and will walk you through the steps needed to complete your course.
Template Gallery	Access more than 250 templates directly within Lectora, which are conveniently categorized and include helpful descriptions of each template. Makes creating a title easier than ever before!
Internal Content Organization	Lectora's layout and interface enables you to maintain efficient content organization for faster development and file access.
External Content Organization	Lectora copies, organizes, and stores all necessary files into one easy-to-access directory, saving time in locating folders and files.
Help Guide	Provides instructional and user friendly information on Lectora and links out to the Lectora User Guide and Lectora Community Forum so you can find answers and advice on Lectora.
Helpful Wizards & Tools	
Flash & Games Library*	Keep learners engaged by easily adding interactive flash animations and games to your courses. Choose from a library of customizable flash games and animations such as flash cards, jigsaw puzzles, million dollar question game, tic tac toe, text animations, male and female characters, digital and analog clocks, and more.
Background Wizards	Choose from a gallery of 38 pre-designed backgrounds which are conveniently categorized by type or create your own custom background to enhance visual appeal.
Animation Wizards*	Easily create more engaging courses by using the animation wizards which guide you through configuring and customizing Flash animations from the Media Library.
Button Wizards	Utilize the seven types of pre-designed and pre-defined buttons or four custom buttons. Edit button text, size, and colors or add animated GIF buttons or your own navigation quickly and easily.
Chart Creator	Save time by quickly creating a variety of charts, such as bar, pie, and line charts based upon standard spreadsheet formatted data. Charts will appear as editable images that can easily be recreated.
Clip Art Gallery	Never worry again about searching for images on the Internet. Simply utilize the Clip Art Gallery, which contains more than 6,000 images directly accessible within Lectora.
Translation Tool	Quickly and easily import and export all text with the single click of a button to aggregate all text into a single document for you to easily translate.
Shapes & Lines Designer	Choose from an array of shapes and lines, such as arrows, circles, squares, triangles, trapezoids, parallelograms, and more to enhance visual appeal.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Rapid Development	
Border & Margin Creator	Make text stand out by creating completely customizable text blocks with margins and borders that include graphic options such as 3D cutout and 3D ridge border.
Automated Menu Builder	Build customizable menus quickly and easily with optional borders, colors, and backgrounds. Align menu items and multi-line items to enhance the look of your menu.
Alignment Tools	Align and space multiple objects easily to ensure consistency.
Inheritance	Eliminate repetitive inserting of the same objects for high speed content development by easily inheriting specific objects throughout your entire title or specified chapters.
Resource Manager	Quickly locate any resource throughout your title for fast deletion, revision, or editing.
Keyboard & Configurable Shortcuts*	Create your own custom shortcuts, add new hotkeys to the standard set of tools within Lectora, or utilize pre-existing keyboard shortcuts, which saves time and increases efficiency.
Time-Saving Page Layouts	Ensure consistency of the look of pages by utilizing any of the 25 predefined page layouts or create your own custom layout to save time and share with colleagues.
Easy Moving of Individual Objects Within a Group	Save time by quickly moving individual objects within a group by simply holding down the ALT key while moving the object.
Reestablish Object Order	When selecting an object during editing, the object is brought to the top level so users can easily see and manipulate it. After editing, the object automatically goes back to the level it was originally placed.
Time-Saving Tab Key Navigation	Save time by quickly switching focus between objects in your workspace with the simple stroke of the tab key.
Convenient Text Styles	Easily apply your desired font settings that are automatically saved as text styles within Lectora, which can be shared between authors or courses.
Display HTML Page Names	Conveniently view the HTML page names within your title at the top of each page properties box.
Paragraph & Text Formatting	Format text and paragraphs similar to popular word processing programs by adding bulleted and numbered lists which can start at any number you choose, indent text, check spelling, highlight text, and much more. Save time by utilizing the font drop-down list that shows a visual representation of the font type and places the most recently used fonts at the top of the list.
Wrap Around Text Blocks	Text automatically moves and wraps around images, making the layouts of text boxes with images easy to design.
Edit Mode Navigation	Navigate between pages easily while in edit mode by utilizing the page up and down keys that enable you to quickly switch between pages.
Convenient Left-Hand Pane Options	Save time by quickly opening chapters and sections in the left-hand pane all at once or easily collapsing them with one click of a button. Also set your desired width of the left hand pane and have it saved and restored each time Lectora is launched.
Equation Editor	Create and edit mathematical formulas and equations.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Rapid Development	
Table of Contents	Generate an optional customizable table of contents instantly for easy user navigation.
Media Open Dialog	Conveniently play and preview all audio and video before adding it to your title.
Grids & Snap to Grids	Organize content on a page and easily space and align objects to the pixel, which saves time in creating the layout of pages.
Zoom	Easily edit content by zooming in or out.
"Paste As" Functionality	Paste in rich text, plain text, and different formats of images and conveniently keep your desired text format options when pasting from your clipboard, which saves time and effort.
Multiple Text Block Formatting	Format multiple text blocks at once, which provides the convenient ability to change all fonts within selected text blocks to match.
Font Color Control	Easily apply the last font color you used to other text in your title. Lectora remembers your last color selected and can apply this color to text with a single click.
Object Drop Visibility	While moving pages, chapters, or objects in the left hand pane, use the lines between objects to ensure accuracy.
Display Cursor Position/Color	Know exactly where your cursor is within a title with the ability to display the X and Y coordinates of the cursor. Also ensure graphic consistency by displaying the RGB value of the color where the cursor lies.
Eyedropper Color Selection	Change the color of text, shapes, or lines to ensure that they all have matching colors and maintain consistency. When using a custom color, save time by applying it to all color selections within your title.
Easy Object Moving	Easily move objects horizontally or vertically by holding the Shift key, thus saving time in designing or changing the layout of a page.
Automated Page Numbering	Number pages within a title, chapter, and/or section instantly to save time and effort.
Auto Update	Check for Service Packs automatically, keeping you up to date with the latest modifications.
Global Font Control	Change global font type, color, and/or size across an entire title to save time.
Specify Offsets for Objects	Inherit objects from all sides of the page, enabling you to quickly create headers, footers, and right or left side page navigation.
Search, Find & Replace Text	Search and find all text easily within a title, including question feedback, message display, menu text, action object URLs, and notes and easily replace the specified text if desired, saving time and effort.
Reference List	Generate a comprehensive reference list automatically at the end of a course, which can include author, title of work, web address, publisher, and date of publication to ensure attribution and copyright laws.
Group Objects	Create hide/show actions quickly and efficiently by grouping multiple objects together, thus saving time in creating interactivity.
Group Actions	Create an action group to trigger several actions at once, saving time and effort.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Object Search	Quickly find objects by utilizing the search function.
Fast Import and Filter	Easily import XML or run filters, such as the zip filter, without having to open a title first.
Defaulted Object & Action Name	Easily identify the objects you've used by defaulting to the name of the resource, saving time in locating objects. Also quickly locate actions by defaulting to the name of the "on" and "action" fields.
Easy Object Editing	X and Y coordinates show the width and height of selected objects so you can quickly and precisely edit the size and position of selected objects. Simply click once inside the coordinates and values will be automatically highlighted for fast modification.
Optional Text Formatting Marks	For easy editing, display text formatting marks such as paragraph returns, spaces, page breaks, and more.
Object Icons	Locate objects in a list quickly by viewing icons for objects in your title.
Reset Objects to Original Size	When editing an image, animation, or button, easily reset the object to its original size in order to eliminate stretching and keep the initial quality of the object.
Adjustable Spacing and Line Height	Adjust line height within a text block and choose your own paragraph spacing.
Sharing & Reviewing Content	
Course Notes	Enhance a collaborative authoring environment by adding notes to a course, which tracks the name of the author who created the note and the time it was created.
Notes Report	Print a report of all the notes in your title for a helpful quick reference.
Export to Word*	Easily repurpose and share course content in a Word document by exporting the text from your title to Microsoft Word (.doc).
Save Title as Template	Save your Lectora title as a template to increase consistency and efficiency. Enables authors to share designs across an organization.
Learning Object Library	Store and share objects conveniently for other authors to easily access.
Contextual Printing*	Conveniently print specific content within desired chapters, sections, or pages to easily review or share content.
Import/Export to Zip	Zip/Unzip a title to a single file to exchange files quickly and efficiently.
Media Library	Save time and stay organized by having one central location for all your media files which can include keywords and metadata to easily search through all media in your library. Enhance collaboration by making your media library accessible to multiple users.
Import from Existing Title	Share chapters, sections, or pages from existing Lectora titles, which promotes a collaborative authoring environment.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Interactivity	
Extensive Media File Support	Insert an array of media files such as images, audio, video and Flash. Edit the size and position of your media and add actions to enhance interactivity.
Actions	Create interactive content without the need for Flash by utilizing an array of actions that can move, start, stop, show, hide, size and play objects or go to specific locations within your course.
Page and Object Transitions	Make pages and objects more animated with transitions such as wipes, splits, checkers, strips, fly actions dissolve, circles, and boxes.
Hyperlinks	Easily add hyperlinks to text, which links to another page, section, web address or e-mail address. Conveniently change the default hyperlink color to enhance the look of a course.
Launch Programs & Documents	Engage end users by adding programs or documents, such as PDFs, Microsoft Word, Excel, and PowerPoint. Simply drag and drop your desired files directly into Lectora and easily select any additional file from a drop-down list of previously added files, thus eliminating time spent inserting documents.
Flash Conversion	Automatically compress and convert all video and audio to Flash format prior to or upon publishing. Provides better compression for faster loading of content, high quality files, smaller file sizes to free up bandwidth space, complete browser compatibility, and the option to view videos in full screen.
Streaming Flash Videos*	Eliminate the need for users to download videos within a course by streaming Flash videos from any location on the Web.
Streaming YouTube	Enable learners to conveniently play a YouTube video directly in a Lectora title.
Skinnable Flash Player	Easily change the color and style of your Flash Player by choosing from predefined Flash Player skins.
Replaceable Audio Graphic	Enhance the look of a course by replacing the speaker icon with any graphic of your choice.
Action Target	Quickly scroll to a specific object with the action target called current page, which is ideal for Section 508 compliant content because it enables viewers to skip over repetitive navigation.
Forms	Create electronic forms by adding pre-created or custom form elements such as text fields, radio buttons, check boxes, pick lists, and drop down menus. Configure forms to receive real-time, two-way data.
Enhanced Form Objects*	Save time and effort by using the same variable within multiple forms, thus conveniently populating previously entered form data. This is especially beneficial when creating form simulations and eliminates the need to retype existing variable information.
Secondary Navigation	Enhance the user experience by enabling users to easily go back to the previous page they were viewing, just like a browser's back button.
Pop-up Windows	Enhance interactivity and visual appeal by adding customizable pop-up windows to courses. Pop-up windows in HTML titles appear in a modern, browser-based window, eliminating all pop-up blocker and message error issues.
Media Pausing	Pause audio, video, or animation that can later be resumed so students can view and listen to media content at their own pace.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Move to/Size to Actions	When using move to or size to actions, your objects will automatically animate to the position or size you select and a slider will be added to enable users to adjust the speed of the animation, providing a better end user experience.
Embedded Objects in Text	Insert images, animations, or equations inside text blocks to add flair to content.
Vertical Text Block Scrollbar	Provide end users with the ability to easily view long text in a vertical scrolling text block that can be moved up and down for easy reading.
Content Accuracy & Protection	
Author Control	Prevent inadvertent revisions in collaborative authoring environments by password protecting portions of a Lectora title.
Auto Save	Save your work automatically every 5 minutes or the time interval you choose. Never worry about losing your work with the Auto Recovery option.
Multiple Saving Options*	For added security, use the Save As option in the File menu to create a copy of your current title. After the title is copied, the newly created copy of the title will be opened, ensuring that any changes you make are saved to the latest version. In addition, you can also choose 'Save A Copy' to save a copy of your title to a location you specify and the existing copy will remain open for you to continue working on it.
Spell Check	Ensure spelling accuracy of all content in English, British, and Canadian English variants, including questions, by automatically checking all text within a title for errors. Choose to spell check automatically as you type or wait to check your course later.
Auto Error Check	Make any necessary corrections on the fly with Lectora's automatic error checking feature and conveniently print content located in your error check dialog box.
Published Content Protection	Protect published content and make it nearly impossible for students to copy and paste from course pages.
Lock/Unlock All	Make your content safe and secure by locking and unlocking the size and position of multiple items at once.
Warning Message Preferences	Create your own custom warning messages. This enables you to eliminate certain warnings, such as warnings for resource sizes, Macintosh content, and/or unused resources/variables.
Metadata Security Levels*	Define course security levels within the metadata field which can be used by your LMS to ensure security clearance for specific content.
Version Editor	Switch to editing copies of titles that are saved in different directories, enabling changes to be easily made to files saved in different locations without affecting your original copy.
Tests & Surveys	
Advanced Testing Features	Create pre-tests, random quizzes, surveys, and tests with any combination of true/false, multiple choice, essay, short answer, drag-and-drop, fill-in-the-blank, matching, or hot spot question formats, which can become interactive by adding distractors or actions to question objects. Results can be easily recorded and tracked electronically.
Reset Questions	Automatically reset individual questions on a page so they automatically return to their original states, which is ideal for repeating a question until it is answered correctly.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Editable Test Results	Personalize test results and incorporate your own creativity by utilizing an array of colors, adding images, and adding dynamic fields, which will then appear in the published content.
Survey Questions	Engage learners by creating survey questions, which can be graded or not, in true/false, multiple choice, short answer, essay, fill-in-the-blank, hot spot, Likert, or ordinal question format.
Assignable Unit Prerequisites	Create custom learning paths quickly and easily by specifying requirements for moving to a specific part of a course.
Grading and Results Tracking	Submit assessment scores and results instantly via e-mail to multiple addresses, CGI, XML, AICC, or SCORM. Provides seamless integration with any standards-based learning management system.
Print Test Results	Print test results when published to HTML or CD-ROM, providing you with a hard copy of the results to file for future use and/or distribution.
Customizable Questions and Tests	Control the color and layout of tests and assessments by including a wide array of multimedia and interactivity. Also, create weighted questions for enhanced flexibility and specify whether you would like to round up or down in order to round the scores of tests, combined tests, and surveys involving numbers.
Bulk Question Importer	Import already existing questions and files stored in access databases, excel spreadsheets, or flat files, saving time and effort in creating questions.
Certificate Tool	Reward users for a job well done by quickly creating certificates for test or course completions. Simply use certificate templates that you can easily customize with desired colors and fonts as well as specified names and dates.
Immediate Question Feedback	Engage students by instantly displaying question feedback after each question is answered, but before the answer is submitted.
Progress Bar	Learners easily see how much time they have left to take a test or survey or view how far they are through a course, providing them with the added convenience of being able to pace themselves.
Customizable Multiple Choice Questions	Display multiple choice answers in a drop down list or in a list box, providing greater customization and a more diverse look.
Separate Grading	Include more than one correct answer for multiple choice and hot spot questions and have each answer graded as a separate question.
Custom Likert Responses	Create custom responses for Likert questions by specifying your own desired number of choices and using your desired text.
Likert Tables	Save time by creating multiple Likert questions in one table format rather than having to create each Likert question one by one.
Publishing	
Single-Click Publishing	Publish to the Internet, CD-ROM, Single File Executable, AICC, SCORM, CourseMill, or any standards-based LMS with the simple click of a button. Enhances ease of use and serves as an added time saver.
Publish to iPhone	Stay on top of cutting edge technology and provide learners with multiple ways to access courses by choosing from ten templates and two wizards to conveniently publish Lectora titles to iPhone and iPod Touch.

Features Guide

Feature	Description/Benefit
JavaScript Title Manager	Eliminate the need for a Java applet with the option to publish to AJAX, which overcomes most LMS or firewall issues often associated with plug-ins.
Intelligent Publishing	Publish and upload only content that has been revised, edited, or altered. Eliminates unnecessary publishing and reduces production time.
Preview/Test in Browsers*	Ensure course compatibility with multiple browsers by conveniently previewing and testing each page on multiple browsers. Use the pull-down on the Preview button to choose the browser in which you want to preview your published title.
XHTML 1.0-Strict Compliancy	Produce titles in Lectora that are compliant with the most up-to-date Internet standards.
Render Text as Image for HTML	Convert text to graphics to ensure that all end users see your content as you intended upon publishing. Also prevents your proprietary information from easily being copied.
Form Element Labels	Screen readers recognize form elements by automatically associating text objects with particular form elements, thus providing it with a label and linking the object and the text. This is ideal for Section 508 Compliant content.
HTML Text Tags	Easily save the headers of text blocks as pure HTML, which enables the header to be read by search engines. This is ideal for websites that you would like to be found by Google, Yahoo, and other major search engines.
HTML Preloading	Enhance speed by providing quick HTML page loading.
Convenient Printing Options	Print specified pages, actions, or objects in a course or print storyboards and title outlines to present ideas when a computer isn't available, to edit hard copies, or keep a physical record of a title.
Total Error and Warning Display	Warnings and errors displayed during publishing are totaled so you can quickly view the number of warnings and errors, making it easy for you to know how many items need to be fixed in your title before publishing.
508 Compliance Checker	Create 508 Compliant courses by conveniently checking your title for consistency with Section 508 accessibility guidelines directly within Lectora and receive helpful feedback on how to resolve any issues in your title that do not meet these guidelines.
Customized Icons	Add custom icons to create association with your brand or for easy recognition when publishing as executable files.
Adjustable Image Compression	Decide how much or how little you'd like to compress images in a course when they are converted during publishing.
Internet-Ready Images	Convert supported image types to Internet-ready formats, enabling anyone to view the images via the Internet.
Automatic ALT Tags	Use the first 128 characters in a text block as the Alternative Tag (ALT Tag) when the text is published as an image, eliminating the need for you to type in a description by hand.
Specialized Features	
Configurable Runtime Verbiage	Customize the test results window that appears after a test is completed, enabling you to quickly reword or translate result messages into another language.
Flash Parameters*	It's easy to change the configuration of Flash animations that are inserted in your title. Simply use the pull-down lists in the Value fields to make the selection of values fast and easy. You can even make existing Flash files appear transparent on the web and add startup parameters.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Cross-Domain Redirector	Eliminate the need for the signed applet, thereby enhancing AICC communication.
Comprehensive Metadata Support	Create and manage metadata by enabling search engines and learning, content, and knowledge management systems to identify, track, and source content. IMS metadata is turned on by default.
Import External HTML Objects	Increase the dynamics of your course by easily importing scripts, applets, meta tags, ASP and JSP scripts, and additional HTML code created outside of Lectora. Also provides added support for ColdFusion and ASPX.
Integration Packs	Add additional "Publish To" options that provide advanced compatibility. Enables Lectora to seamlessly publish directly to systems such as Blackboard, SumTotal Systems, and more.
Variables*	Build advanced dynamic functionality and tracking such as elapsed timing, logical branching, advanced results tracking, browser checks, and more. When modifying variables, save time with the Subtract from Variable modification type which enables you to remove all instances of a character string from a variable's value.
Conditions	Set your own rules and prerequisites for running actions within Lectora, enabling you to only run certain actions based on your specifications.
Empty Relationship Variable	Check to see if your variables do not contain content by using relationships for conditions which determine when a variable is empty.
Random Value Variable	Set random value variables to enable a response to happen from a pool of options.
Variable Manager	Quickly and easily sort through variables within your title by viewing the names of variables used and where they are located. Saves time and provides greater organization.
Debug Mode	Quickly debug courses that include multiple variables and actions before publishing. This mode can show a debug window that will display variable data, data sent to and from scripts, actions triggered, and other debug information.
Debug Publish Option	Debug courses during publishing and choose your own logging options so you can specify what information you want to see when debugging.
Debug Mode Variable Change	Quickly change variables on the fly while previewing a title in debug mode.
Automatic Unused Variable Removal	Easily clean-up and maintain your title by automatically removing unused variables upon publish.
Cryptic Test File Names	Test files contain random, cryptic names to help prevent cheating.
Copy Conditions	Save time by easily replicating previously used conditions within your course. Simply copy a previously used condition and reuse it.
Custom SCORM Manifest Identifier	To differentiate between your course manifest name and the course name used within your LMS, the Manifest Identifier uses the Course ID rather than the MANIFEST1 when publishing to SCORM.
Pro Suite Only Features	
Screen Capture Tool	Save time in creating software tutorials, presentations, demonstrations, and more by easily capturing, cropping, editing, and importing screen shots in Lectora.

* New for Version 9.2

Features Guide

Feature	Description/Benefit
Screen Camera	Produce animated software simulations and application tutorials, which can be saved to Flash format.
Video Editor	Edit video files within Lectora and save to Flash format, saving time.
Audio Recorder and Editor	Record and edit audio files instantly using a built-in or external microphone, which can be saved to Flash format.
Image Editor	Edit photos and graphics effortlessly with the built-in image editor.
RealPlayer Media Native Support	Play RealPlayer media content natively within Lectora, enabling the audio editor, video editor, and screen camera to seamlessly work with the selected media.
QTI Question Import/Export	Import/export questions compliant with QTI standard and republish with full standard support, providing enhanced compatibility.
Screen Camera WMV File Support	Never worry again about how recorded audio and video will be handled on the Internet due to WMV/WMA format support for recordings, which is a highly compressed format suitable for the web.
Synchronized Actions with Audio and Video	Easily synchronize actions with events included in the audio and video used on a particular page for tighter sequences and interactions involving audio and video files.
Application Network	Link internal or external video, audio, images, text, and other editing applications to form a single authoring network as the central hub, saving time and effort.

Lectora System Requirements

Intel or 1.3 GHZ or equivalent

512MB RAM

250MB Free hard drive space for application

Windows 2000, XP, or Vista

Help Agents require Flash Player 8.0 or higher

Internet-published content is cross-platform compatible with Microsoft Internet Explorer 6.0 and higher, Firefox 1.0 and higher, and Safari 1.2 and higher

Supported Media Types

Images: TIF, GIF, JPG, BMP, PNG, WMF, EMF, IPIX

Audio: WMA, WAV, MID, RMI, AU, MP3, AIFF, FLV

ASF (streaming audio by Microsoft) or RM (streaming Real Audio)

Video: WMV, FLV, AVI, MOV, MPG, MPEG, RM, RAM, ASF (streaming video by Microsoft) or RM (streaming Real Video)

Documents: RTF, TXT

Other: Shockwave, SWF, Java, Javascript, ASP, JSP, PHP, ColdFusion
