Lectora Fundamentals*

What You'll Learn:

You'll learn how to create a title from scratch. This includes:

- Creating a title's organization and adding text, images, and other media to the title.
- Creating interactive components such as rollovers and hotspots.
- Using Lectora's time-saving tools and wizards to create buttons, page numbering, and certificates.
- Learning how to create a graded test assessment, and how to submit it to an email address, a back-end database, or a Learning Management System.
- Checking a title for errors and publishing for the Web.

Where & When - One Day Session:

- Cincinnati, Ohio: 1st and 3rd Monday of each month
- Boca Raton, Florida: Every Monday of each month

Lectora Intermediate*

What You'll Learn:

In this course, you'll learn how to take your Lectora knowledge to the next level. This includes:

- Creating additional interactivity with the use of actions.
- Building re-usable components or library objects for future use.
- Using variables to capture student input.
- Creating conditional branching and non-linear navigation.
- Randomizing test content.

Where & When - One Day Session:

- Cincinnati, Ohio: 1st and 3rd Tuesday of each month
- Boca Raton, Florida: Every Tuesday of each month

Lectora Extreme*

What You'll Learn:

Learn how to move beyond the basics of Lectora to produce advanced functionality. This includes:

- Creating pre-tests that will count towards completion of a course.
- Displaying completion status so users can measure their progress.
- Creating custom, gradable questions that are not of the standard 6 question types.
- Using actions to interact with Flash objects, passing and retrieving information to and from a Flash object.
- Creating small software simulations and using form elements to store user input.

Where & When - One Day Session:

- Boca Raton, Florida: 1st and 3rd Wednesday of each month
